

C2 – Children living in low income and material deprivation

Baseline and Trends: Baseline year – 2004/05. The proportion of children in low income and material deprivation is similar in 2008/09 to that in 2004/05 for each type of family.

The lowest proportion of children living in low income and material deprivation are in families where no-one is disabled. A higher proportion of children in families with any disabled member live in low income and material deprivation than children in families where no one is disabled.

Children living in low income and material deprivation Before Housing Costs

Definition: Disabled people are defined as respondents who report a limiting long standing illness, impairment or disability. Everyone in this group is likely to meet the definition of disability in the Disability Discrimination Act. Data is for United Kingdom. A child is considered to be living in low income and material deprivation if they live in a family that has a material deprivation score of 25 or more and a household income below 70 per cent contemporary median income, Before Housing Costs, see Households Below Average Income for further details (<http://research.dwp.gov.uk/asd/hbai.asp>).
