

I2 – People with long-term conditions supported to be independent and in control of their condition

Baseline and Trends: Baseline year – 2007/08. Figures from 2007/08 show that the percentage of people with a long-term condition who had sufficient support from local services or organisations to help manage their long-term health condition(s) is 74%.

People with long-term conditions supported to be independent and in control of their condition

Definition: Respondents who were supported to be independent and in control of their condition and answered 'Yes' to the following question: "In the last 12 months, have you had enough support from local services or organisations to help you to manage your long-term health condition(s)?". Respondents who define themselves as having one or more long-term conditions, answered 'Yes' to the following question: "Do you have any of the following long-standing conditions? - Deafness or severe hearing impairment; blindness or partially sighted; a long-standing physical condition; a

learning disability; a mental health condition; a long-standing illness, such as cancer, HIV, diabetes, chronic heart disease or epilepsy". Data covers England.
